Subtle matte feel, non-solid color without textures.

Galaxy Grey

Subtle matte feel, non-solid color without textures.

Star Grey

Subtle matte feel, non-solid color without textures.

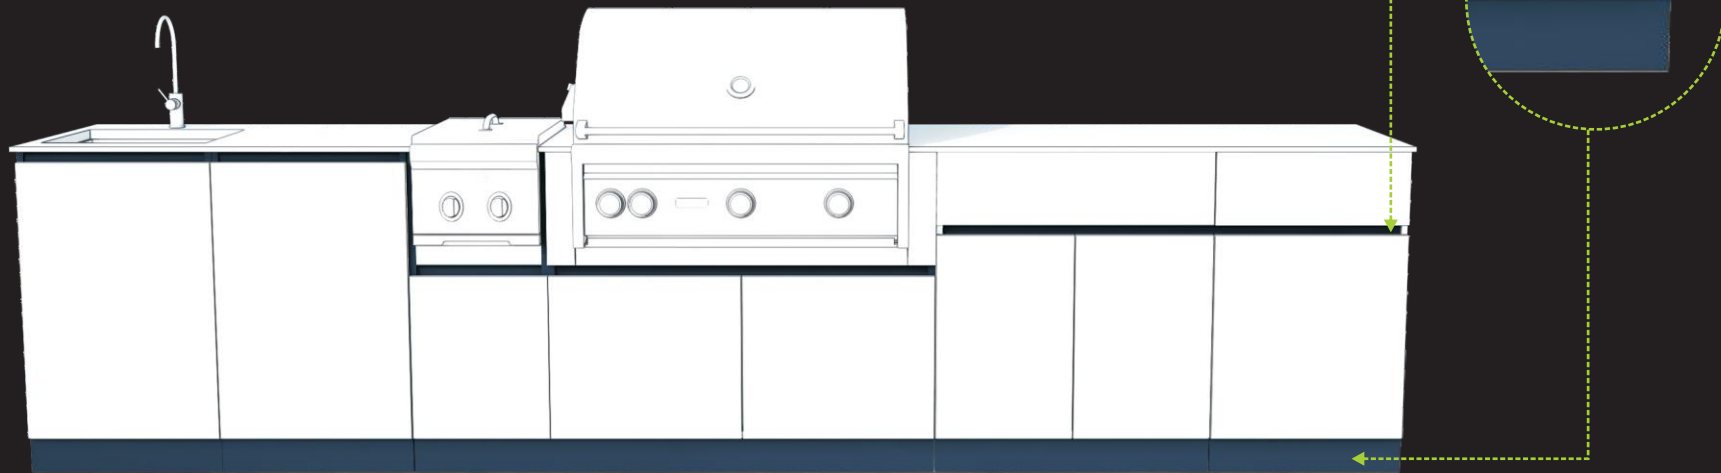

Pure Grey

Subtle matte feel, solid color without textures.

Handleless Horizontal Beam & Toe Kick

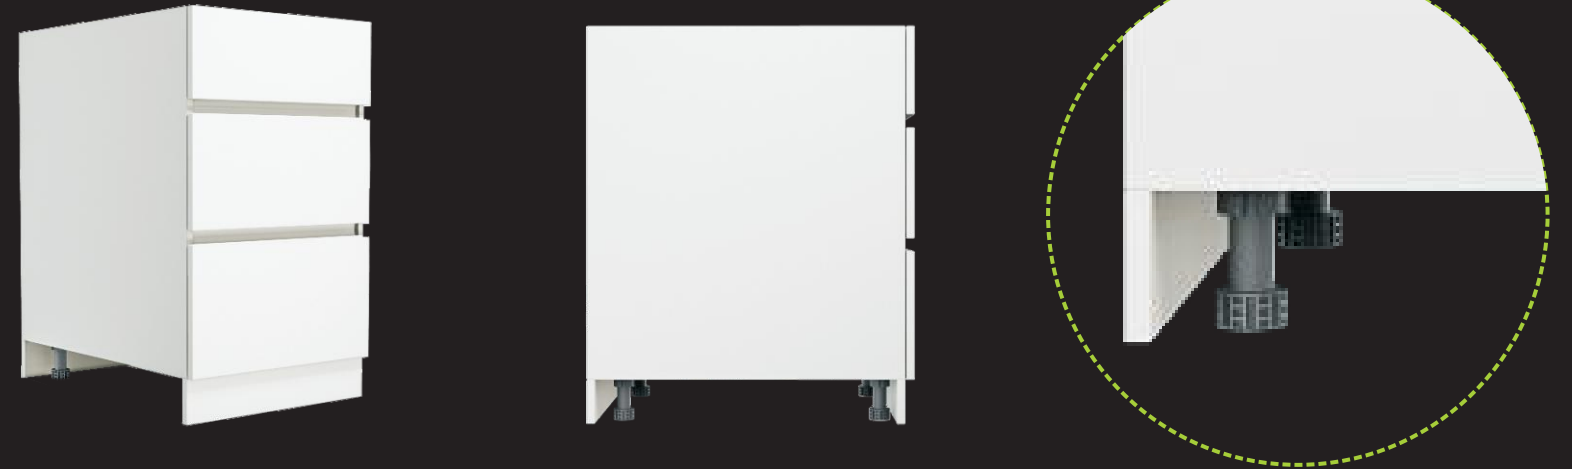

SPACE outdoor cabinets feature a handleless beam design that combines modern aesthetics with practical advantages. This handleless layout minimizes the risk of accidental collisions and injuries, especially in environments with children.

The presence of toe kick maintains the overall perfect look of the cabinets. Both the handleless beam and the toe kick are made from extruded aluminum profiles that match the cabinetry material for a smooth surface that is easier to clean and maintain, and ensures a uniform color scheme or striking clash of colors that blends in with the cabinetry.

Adjustable Leveling Feet

SPACE outdoor cabinet is equipped with adjustable leveling feet, which is a significant advantage for outdoor installations. These feet allow the cabinet to be leveled on uneven ground, ensuring stability and a professional appearance. They also provide a barrier between the cabinet and the ground, protecting it from moisture and potential damage caused by directly contact with the ground.

Stainless Steel Hinges

Stainless steel hinges provide a strong connection between the cabinets and the doors, ensuring stability and durability for opening and closing.

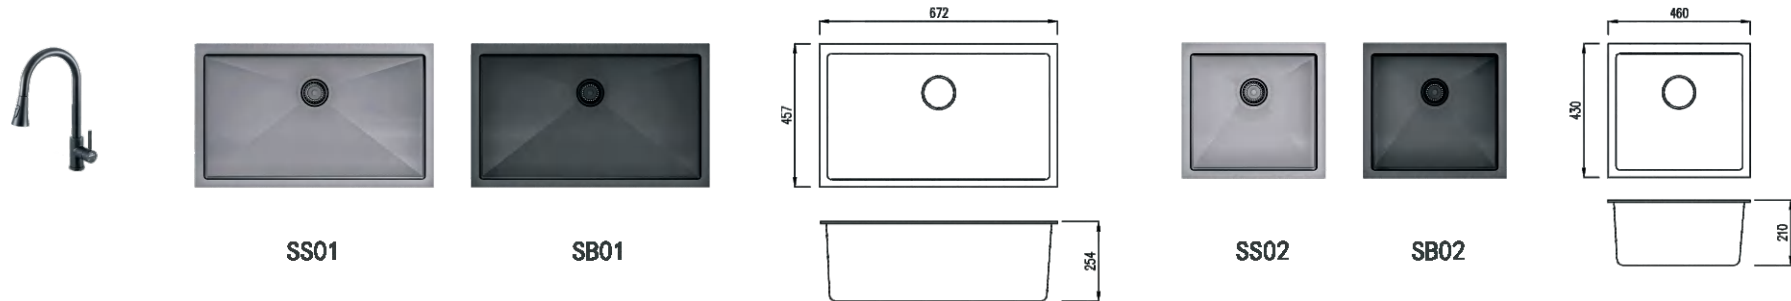

Custom Trim kits

SPACE grill cabinets come with custom trim kit to ensure compatibility with a variety of popular grill brands and models on the market.

Stainless Steel Sinks & Faucets

The cabinet is fitted with stainless steel sinks & faucets, available in both stainless steel and black finishes. Stainless steel is an excellent choice for outdoor use due to its corrosion resistance and durability. It is also easy to clean and maintain, withstanding the rigors of outdoor living. The black finish option adds a touch of elegance and can help hide water spots and smudges, maintaining a pristine appearance.

Integrated Trash Bin Cabinet

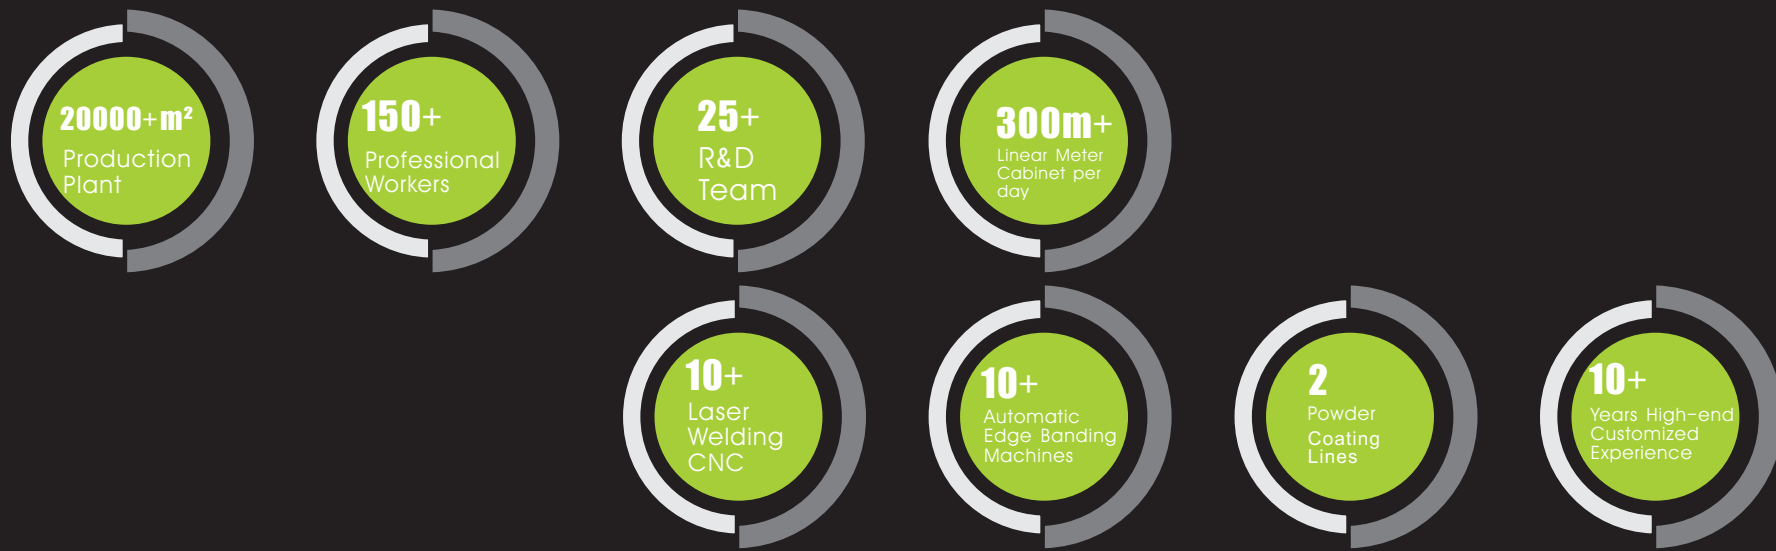

The cabinet features an optimized trash bin design where the trash bin is integrated with the cabinet door. When the door is opened, the trash bin is pulled out, making it convenient and hygienic to use. The integrated trash bin design saves space and reducing clutter. It also keeps the trash bin closing when it don't use, maintains a clean and organized appearance in the outdoor kitchen area.

SPACE Works

We are from High-End
 Extends the opulent experience of high-end interior design into the expansive realms of outdoor spaces with aluminum cabinet.

On the Way
 Make aluminum cabinets the chic centerpiece of your outdoor lounging area.
